ABOUT ME

Full-stack developer with a background in graphic design, bringing a unique blend of technical and design thinking. Passionate about creating intuitive user interfaces and seamless user experiences using React, Node.js, and Express.js. Leveraging front-end expertise alongside back-end capabilities to deliver cohesive, end-to-end web solutions.

EXPERIENCE

Lead Full-Stack Developer - CHINGU (internship)

November 2024 - Present

- Led full-stack development team using Next.js, TypeScript, and PostgreSQL in an Agile environment
- Designed and developed intuitive user interfaces for responsive web applications using React
- Implemented authentication flows and scheduling optimization system
- Built resident portal and admin dashboard for solar panel assessments
- Created reusable component libraries and established robust architecture patterns

React Developer (portfolio development)

July 2023 - Present

- Developed responsive web applications with React, JavaScript and modern frameworks
- Implemented modern UI components and state management solutions
- Designed and implemented custom animations and interactive elements
- Created reusable component libraries and design systems
- Built and maintained personal portfolio showcasing web development projects

Graphic Designer - GREY

January 2022 - May 2024

- Created engaging digital content, animations and interactive media
- Designed brand visuals and marketing materials across digital and print media
- Led multi-platform design projects in close collaboration with photography and production teams
- Delivered pixel-perfect designs under tight agency deadlines
- Maintained brand consistency across diverse marketing campaigns

Graphic Designer - GARDEN OF WORDS

April 2021 - January 2022

- Created engaging digital content across social platforms
- Developed interactive animations and infographics
- Built digital catalogs and brand presentations
- Maintained visual consistency across platforms
